Profile

Innovative Site Reliability & DevOps Engineer with 10+ years of experience designing, scaling, and securing multi-region cloud platforms. Proven success in building CI/CD pipelines, implementing Infrastructure as Code, and integrating AI/LLM services into production environments. Expert in AWS, Kubernetes, Terraform, Helm, and observability stacks (Datadog, Prometheus, ELK). Adept at leading migrations, reducing costs, and improving SLAs for high-volume microservice architectures. Committed to compliance (SOC 2, ITAR, FedRAMP, PCI) and measurable business impact.

Key Achievements

- Designed and operated cloud infrastructures supporting 99.99% availability across four regions.
- Migrated 200+ microservices from on-premises to AWS with zero downtime and 30% cost savings.
- Built and scaled MLOps platforms integrating Anthropic & GPT LLMs, reducing model deployment time from days to hours.
- Delivered a unified AWS platform enabling self-service provisioning for 100+ engineers via a Python-based CLI.

Professional Experience

DISCO, Staff DevOps Engineer

12/2023 – Present | Austin, TX

- Architected a hybrid CI/CD platform (GitHub Actions + AWS CodePipeline) enabling 50+ deployments/day.
- Created Terraform IaC modules for automated provisioning, cutting manual setup by 80%.
- Built and scaled an MLOps platform integrating Anthropic & GPT LLMs, reducing deployment time from days to hours and enabling secure multi-region serving for 20+ AI microservices.
- Implemented multi-region Kubernetes + Fargate clusters achieving sub-second failover.
- Developed unified observability with Datadog, Prometheus, and OpenTelemetry improving MTTR by 45%.

MNTN, Senior DevOps Engineer

12/2023 – 07/2025 | San Diego, CA

- Led migration of 150+ applications to AWS Cloud with zero downtime, cutting infrastructure costs by 25% and improving deployment frequency 3x.
- Designed and managed a secure multi-account AWS environment compliant with ITAR and FedRAMP.
- Built an internal platform (Terraform, Helm, AWS CLI, Packer) enabling push-button microservice deployment.

Altium, Head of DevOps

01/2021 – 12/2023 | San Diego, CA

- Directed a team of 8 DevOps engineers delivering continuous delivery pipelines (Jenkins → GitLab).
- Built production-ready AWS GovCloud hosting critical workloads with full SOC 2 and FedRAMP compliance.
- Developed an Istio-based service mesh (Python + Go) to manage traffic across multi-region Kubernetes clusters.
- Deployed AWS Bedrock LLMs to power marketing ML processes, increasing campaign personalization speed by 3x.

Rakuten Rewards, Senior DevOps Engineer

05/2010 – 01/2021 | San Francisco Bay

- Launched multi-cloud platform spanning AWS & GCP improving disaster recovery posture.
- Automated infrastructure provisioning using Terraform/CloudFormation saving 200+ engineer hours/month.
- Defined SRE processes achieving 99.99% SLA for critical systems.

Lunar Pages, Senior Software Engineer

10/2006 – 05/2010 | San Diego, CA

- Built a full web hosting control panel and customer billing system used by thousands of customers.

Core Skills

Cloud Platforms

AWS (EKS, EC2, VPC, GovCloud, Bedrock, RDS, ECS, Lambda, CloudFront), GCP

IaC & Automation

Terraform, Helm, Packer, CloudFormation, CDK, Ansible, Chef

CI/CD

GitHub Actions, GitLab, Jenkins, AWS CodePipeline, CodeFresh

Containers & Orchestration

Kubernetes (EKS, Fargate), Docker, Istio

Observability

Datadog, Prometheus, ELK Stack, New Relic, OpenTelemetry

Languages

Python (FastAPI, Flask), Go, Java (Spring Boot), React, Bash

Security & Compliance

SOC 2, FedRAMP, ITAR, PCI, IAM, Firewalls (Cisco PIX, Palo Alto)

Education

Bauman Moscow State Technical University,

2003 – 2009

S.Sc. Informatics & Computer Engineering

Languages

English — Native/Bilingual

Russian — Fluent
