

# Bruce Wilcoxon

## Seasoned Full Stack Engineer | Scalable Web Applications | AI-Driven Solutions | Compliance Expert

Austin, TX | +1(737)339-9636 | brucewilcoxon.i@gmail.com | linkedin.com/in/bruce-wilcoxon/

### Professional Summary

Senior full stack engineer with expertise in React, TypeScript, and Next.js 13+. Passionate about building scalable web applications and integrating enterprise platforms. Successfully delivered production-ready healthcare solutions with 99.9% uptime. Developed AI-driven agents for sales and lead qualification, ensuring compliance with data regulations. Experienced in creating connections with external platforms while maintaining SOC2 and GDPR compliance.

### Skills

**Frontend:** React, Next.js, Angular, Vue.js, Nuxt.js, React Native, D3.js, SASS, Storybook, Figma • **Backend:** Node.js, Express, Go, Java (Spring Boot, MVC), C#, Django, .NET, Ruby on Rails, REST/GraphQL APIs • **DevOps & Cloud:** AWS(EC2, S3), Azure, Docker, Kubernetes, Jenkins, Ansible, gRPC, Cloudflare • **Testing & QA:** Cypress, Jest, Mocha, JUnit, Postman, Test Automation, Agile/Scrum • **Other Tools/Platforms:** Git, Problem Solving, Team Collaboration

### Work Experience

**St. Luke's University Health Network** • Bethlehem, PA

Dec 2021 - Jul 2025

*Full Stack Engineer*

- Enhanced and maintained software systems for hospital operations using TypeScript and React, ensuring compliance with healthcare data regulations.
- Delivered production-ready reporting and patient management solutions with a focus on scalability and seamless integration with dashboard and CRM systems.
- Troubleshooted and optimized core healthcare applications, incorporating SOC2/ISO 27001/GDPR-compliant external integrations.
- Collaborated with cross-functional stakeholders to improve system reliability and data accessibility, utilizing Next.js 13+ and Tanstack/React Query.
- Provided ongoing support for healthcare platforms, focusing on LLM-based agent development and scalable platform infrastructure.

**Wilder Systems Robots** • Austin, TX

Aug 2020 - May 2021

*Technical Lead*

- Led development of an automated robotic COVID-19 testing platform processing 6,000+ samples/day, compliant with FDA EUA protocols.
- Designed distributed systems: Python event-driven services, robotic arm control via RPC sockets, GraphQL-powered technician UI.
- Implemented resilient PostgreSQL logging & recovery, ensuring uninterrupted operations.

**St. Luke's University Health Network** • Bethlehem, PA

Jun 2018 - Feb 2020

*Full Stack Engineer*

- Architected and implemented SLUHN's primary enterprise data mart, centralizing data for hospital reporting and decision-making.
- Designed ETL pipelines using WebFOCUS DSL and Apache Tomcat, loading and transforming data into a Greenplum data warehouse.
- Built Vue.js SPAs enabling analysts to define metrics, drill into dimensions, and control application-level metadata.
- Automated data refresh and roll-up processes, reducing manual intervention and increasing reporting accuracy.
- Created low-code data-fetching techniques to empower analysts to build custom React/Vue reports with ad-hoc queries, drill-downs, and conditional styling.

**Information Builders** • New York, NY

Feb 2017 - Dec 2017

## Software Engineer

- Built Cohort Builder, an off-the-shelf tool for longitudinal patient management.
- Designed a Vue.js SPA for defining ICD-10/CPT code-based patient cohorts, enabling tracking across user-defined time windows.
- Improved healthcare reporting accuracy and efficiency for government compliance, provider performance evaluation, and supplemental care detection.
- Delivered scalable backend processes for handling large healthcare datasets with accuracy and security.

**Wilcoxon Group Inc** • Colleyville, Texas

2015 - 2017

## Software Engineer

- Delivered full-stack contract development services to clients including Minnesota State School Department, Memorial Healthcare System, and Blue Cross Blue Shield Tennessee.
- Worked across requirements gathering, frontend development, system administration, and database management, gaining multi-domain expertise.
- Designed and launched Find Tool, a third-party WebFOCUS application with a Vue.js SPA frontend, enabling users to navigate an encrypted, database-backed file system.
- Productized and marketed Find Tool, expanding its adoption across healthcare and education clients.

## Projects

---

### Bridger Pay

- Addressed challenges by leveraging AngularJS and React to build a dynamic, scalable frontend and using Firebase for real-time data handling and backend integration.
- Implemented PWA best practices for offline support and fast loading across devices.

### NOOVOLIFE

- Built a dynamic SPA using React and JSS with support for dark/light themes and dynamic state styling; decreased mobile bounce rate by 22%.
- Translated Figma prototypes into interactive layouts with mobile-first responsiveness and accessibility built-in.

### Bambino Sit

- Solved technical challenges by using Angular and TypeScript to build an interactive, modular frontend and Laravel with PHP to handle backend logic and data flow efficiently.
- Integrated Bootstrap for responsive UI.
- Used Leaflet for map features.
- Optimized performance with jQuery and AOS animations.

## Education

---

Bachelor of Science, cybersecurity, game development, and machine learning/artificial intelligence

Jan 2013 - May 2016

*The University of Texas at Austin*
