

Bruce Wilcoxon

Senior Full-stack Engineer with 7+ years of experience architecting scalable web applications using React.js, Node.js, and cloud platforms (AWS, Azure). Proven track record leading cross-functional teams, optimizing system performance, and delivering robust solutions in fast-paced environments. Adept at building from scratch, driving technical excellence, and communicating complex concepts to diverse stakeholders.

EXPERIENCE

- | | |
|---------------------|---|
| Nov 2021 - Jun 2025 | FULL STACK ENGINEER, St. Luke's University Health Network United States <ul style="list-style-type: none">Engineered production-ready React.js and Node.js solutions, ensuring 99.9% uptime for hospital operations softwareOptimized patient management workflows, reducing manual processing time by 30% through automationIntegrated AWS services (EC2, S3) to enhance scalability and data security for healthcare applicationsCollaborated with cross-functional teams to deliver compliant, high-performance reporting toolsMaintained strict healthcare data compliance, supporting seamless audits and regulatory requirements |
| Jul 2020 - Apr 2021 | TECHNICAL LEAD, Wilder Systems Robots United States <ul style="list-style-type: none">Led development of automated COVID-19 testing platform using React.js and distributed Node.js servicesArchitected resilient cloud infrastructure on AWS, supporting 6,000+ daily samples under FDA EUA protocolsImplemented PostgreSQL logging and monitoring, ensuring uninterrupted operations and rapid incident responseDirected agile team, delivering mission-critical features on aggressive timelinesEnhanced system reliability, achieving 99.99% uptime in high-stakes healthcare environment |
| May 2018 - Jan 2020 | FULL STACK ENGINEER, St. Luke's University Health Network United States <ul style="list-style-type: none">Architected enterprise data mart and ETL pipelines using Node.js and Greenplum, centralizing hospital reportingReduced manual reporting effort by 40% through automation and streamlined data integrationDeveloped secure REST APIs for real-time data access and analyticsCollaborated with stakeholders to define requirements and deliver scalable solutionsEnsured data integrity and compliance with healthcare regulations |
| Jan 2017 - Nov 2017 | SOFTWARE ENGINEER, Information Builders United States <ul style="list-style-type: none">Developed Cohort Builder, a Vue.js SPA for longitudinal patient management and reportingEnabled ICD-10/CPT-based cohort definition, improving healthcare reporting accuracy by 20%Integrated RESTful APIs and optimized frontend performance for seamless user experience |

Collaborated with product and QA teams to ensure feature completeness and compliance

Dec 2014 - Nov 2017

SOFTWARE ENGINEER, Wilcoxon Group Inc | United States

- Delivered full-stack solutions for state and healthcare clients using Vue.js, Node.js, and WebFOCUS
- Built Find Tool SPA, expanding product adoption across multiple organizations
- Automated ETL processes, reducing data processing time by 25%
- Ensured robust system integration and maintained high code quality standards

EDUCATION

2013 - 2016

BACHELOR OF SCIENCE, The University of Texas at Austin

Focused on cybersecurity, game development, and machine learning/artificial intelligence. Developed strong foundations in software engineering, algorithms, and data structures.

SKILLS

React.js

Next.js

Node.js

TypeScript

Python

Django

Vue.js

AWS

Azure

Docker

Kubernetes

PostgreSQL

REST APIs

GraphQL

ETL

Agile Scrum

Test Automation

Jest

Cypress

Figma

Git

Linux

Cloud Architecture

System Design

Cross-functional Leadership

Communication
