

# Christopher Wang

## Senior FullStack Developer

cw321907@gmail.com • Toronto, Canada • <https://linkedin.com/in/intelli-christopher-wang/>

### About Me

---

Senior full-stack developer with 10 years of experience building performant and scalable web and mobile applications. I specialize in modern JavaScript frameworks, including React, Next.js, Vue.js, and Node.js, and I have led the development of fintech, edtech, real estate, and AI-integrated platforms. I am passionate about clean architecture and high-impact user experiences and thrive in collaborative, fast-paced environments.

### Professional Experience

---

**Senior Full Stack Developer**, Real Leverage Consulting Sep 2022 – present | Remote

- Built and maintained an admin dashboard and payment platform using Next.js and Node.js, deployed on AWS EC2 for a finance startup.
- Developed Nuxt.js modules and plugins to manage dependencies and extend application functionality, and integrated OpenAI's language model API to build a chatbot within the Nuxt.js framework.
- Collaborated with the founding team of a startup to design frontend architecture and intuitive UIs for a new web platform.

**Senior Software Engineer**, Trilogy Solutions Jun 2020 – Sep 2022 | Canada

- Maintained and developed new features for Birchbox US, UK, and ES websites, working on a multilingual e-commerce platform.
- Built custom React components styled with Tailwind CSS within a Next.js application, using Prismic as a headless CMS.
- Managed development tasks with a team of two developers, breaking down features into smaller, achievable milestones with clear specifications.
- Designed and implemented UI/UX for user-facing interfaces and set up dev/demo/production environments on Vercel.

**Software Engineer**, WGA Marketing Sdn Bhd Oct 2019 – May 2020 | Malaysia

- Built high-traffic CRM and admin panels using Laravel and React, contributing to a 40% increase in sales revenue.
- Created reusable TypeScript components and GraphQL-integrated services in React, accelerating API response times by 23.5%.
- Implemented dynamic layouts, real-time form validation, and RESTful API integrations, increasing system efficiency by 25%.

**Software Developer**, Rebrand May 2017 – Sep 2019 | Malaysia

- Designed and implemented scalable RESTful APIs using Node.js (Express.js) and Laravel, enabling integration between frontend and backend systems.
- Built and maintained real estate platforms using React.js and Vue.js, resulting in a 50% increase in user engagement and improved site performance.
- Applied software engineering best practices including MVC architecture, ORMs (Eloquent, Sequelize), and middleware design for clean and maintainable codebases.
- Implemented authentication/authorization mechanisms (JWT, OAuth2) and optimized database queries using MySQL and PostgreSQL.

### Education

---

**Bachelor of Computer Science**,  
National Taipei University of Education

2010 – 2015 | Taipei, Taiwan

## Skills

---

### Frontend

React, Next.js, Vue.js, Nuxt.js, Tailwind CSS, Angular, TypeScript

### Infrastructure

Redis, AWS EC2, Vercel, Docker

### AI & Integrations

OpenAI API, ApexCharts.js, Prismic CMS, Shopify

### Backend

Node.js, Express.js, Laravel, RESTful APIs, GraphQL, Supabase, PostgreSQL, MySQL, Firebase

### Tools & DevOps

Git, Jira, Bit.dev [↗](#), Teams

## Projects

---

### HonestDoor [↗](#)

- Developed and maintained core modules using React, Node.js, and RESTful APIs, including property search, valuation report pages, and historical transaction visualizations.
- Optimized backend query logic and implemented Redis caching, reducing average API response time by 30%.
- Launched an interactive property valuation map leveraging PostgreSQL and deployed via AWS, increasing user engagement time by 22%.

### Birchbox [↗](#)

- Maintained and developed new features across Birchbox's US, UK, and ES platforms.
- Developed custom UI components with Tailwind CSS and React in a Next.js app powered by Prismic CMS.
